

## VODA CASE: RETURKRAFT AS

### Co-operation Agreement

In early 2019, VODA and Returkraft started a productive partnership with the aim of obtaining a safer and more efficient operation of the plant; the co-operation has been successful and to the full satisfaction of both parties. The task now is to take advantage of the relationship and the experience gained to provide even greater benefits for the customer.

Execution period: 2019 – 2020

Site: Kristiansand, Norway

### VODA's role:

Execution of maintenance and repair work.

Administrative project manager and sparring partner.

- VODA has performed plant inspection including maintenance of pressurised parts, combustion equipment, and slag systems.
- VODA is a sparring partner for Returkraft regarding the maintenance strategy of the plant.
- The co-operation agreement provides Returkraft with a clear overview of time schedules and task prioritization.
- Due to the collaboration, Returkraft has gained greater insight and understanding of their operation; transparency, openness, credibility and innovation are the key words.
- Returkraft benefits from a cooperative partnership with VODA working proactively and jointly to create the best possible preconditions for optimization and streamlining where it makes sense and adds value.
